MV RIDES

UNICOASTER® 2.0

PRODUCT SHEET

UNICOASTER® 2.0

The Unicoaster® 2.0 offers a unique and exciting ride experience with patented rotating seats mounted on a coaster track. With a significantly reduced track footprint compared to conventional roller coasters, the 2.0 version of the Unicoaster delivers exhilarating twists and gravity-defying inversions reminiscent of hypercoasters right to the very end! The track can be custom designed to fit almost any ride envelope both indoors and outdoors.

The Unicoaster 2.0 trains may be powered by a lift hill, or with electrical propulsion powered by feed rail, when a lift hill is not desired. Custom configuration of track length, trains, and theming make the possibilities endless for integration into any destination.
